

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) An electronic device with a timepiece having a dial face simulating an analog clock, said dial face comprising a display monitor, and said electronic device comprising means for generating a graphical representation of a scheduled activity on said display monitor, wherein the generated graphical representation comprises a segment having a length on the dial face associated with a duration of the scheduled activity, and a location of the segment on the dial face representative of a begin time of the scheduled activity, whereby a user of the electronic device is able to intuitively determine the start and end times of a scheduled activity without reading alphanumeric characters.
2. (Cancelled).
3. (Previously Presented) The electronic device as claimed in claim 1, wherein the segment has a graphical attribute associated with a type of the scheduled activity.
4. (Cancelled).
5. (Previously Presented) The electronic device as claimed in claim 1, wherein the graphical representation is programmable.

6. (Cancelled).

7. (Previously Presented) The electronic device as claimed in claim 1, wherein the said generating means generates, on said display monitor, at least a further graphical representation of a further scheduled activity.

8. (Previously Presented) The electronic device as claimed in claim 1, wherein said electronic device further comprises a communication component for communicating with another electronic device.

9. (Previously Presented) The electronic device as claimed in claim 8, wherein the communication uses a short-range communication protocol.

10. (Previously Presented) The electronic device as claimed in claim 9, wherein the other electronic device comprises an electronic calendar.

11. (Previously Presented) The electronic device as claimed in claim 9, wherein the other electronic device comprises a mobile phone.

12-13. (Cancelled).
